Tommy Truong

Software Engineer

A proficient, dependable and collaborative engineer working at a major Australian SAAS platform. I have covered all aspects of SDLC in an agile environment and am constantly looking for ways to gain and grow skill sets. I have passions both in and out of tech and hope to find a workplace that will allow me to express them.

Experience

January, 2021 - Present

Campaign Monitor | Sydney, Australia

Software Engineer

Roles:

- **Software Engineer**
 - Contributes to the technical vision and direction at the team level, taking ownership and accountability for decisions taken.
 - Communicates both technical and business requirements in a clear and articulate fashion.
 - Identify low level and conceptual problems during code reviews.
 - Displays self sufficiency in understanding of architecture and applying technical decisions.
 - Define and consider success metrics for solutions.
 - Aid and mentor other engineers and identifying opportunities for them to grow.
- **HTML/CSS Crew Member**
 - Write semantic HTML and understand complex CSS selectors, rules, and specific.
 - Provide code reviews and guidance for peers in UI design and development.
 - Present at crew meetings on the latest HTML/CSS trends and facilitate discussions on best practices.

Achievements:

- Successfully mentored an intern over 6 months.
- Joined the HTML/CSS crew and drove meaningful conversations on standards.
- A track record of successfully leading projects within teams since the first year of being on the job.

February, 2020 - December, 2020

CSESOC | Sydney, Australia

Team Lead (Volunteer)

- Spearheaded efforts to redesign and deploy a new CSESOC website within a year.
- Communicated with team members regarding goals, requirements, and progression of team goals.
- Implemented a DevOps culture and created lean and autonomous code.
